

Bridgewater EPC 500

The Bridgewater EPC 500 features the Bridgewater Home Subscriber Server, Policy Controller, and Subscriber Data Broker for the LTE evolved packet core, pre-integrated on a carrier grade Sun T5120 platform.

The EPC 500 system leverages standards-based interfaces to EPC components such as the MME, Serving Gateway, and PDN Gateway allowing for a vendor neutral solution that can be easily implemented in days to accelerate LTE trials and commercial deployments.
