

Bridgewater Policy Controller/PCRF

The Bridgewater® Policy Controller is a highly flexible and scalable policy server specifically designed to help service providers manage the impact of mobile data growth on their networks and generate revenue from personalized mobile data services.

The Policy Controller is fully compliant with the Third Generation Partnership Project (3GPP) Release 7, 8 and 9 standards for the Policy and Charging Rules Function (PCRF) and can be deployed in HSPA, EVDO, WiMAX, and LTE networks as part of the evolved packet core (EPC).

The Policy Controller works with multiple types of policy enforcement points in the network—such as access gateways, DPIs, and content optimization solutions—to manage network resources, applications, and the subscriber experience in real time.

Why Bridgewater Policy Controller?

- Extensive use case support helps service providers optimize their network infrastructure and launch new revenue-generating services.
- Flexible support for multiple policy enforcement points means policy decisions can be enforced on multiple devices in the network, including device client, deep packet inspection, access gateway, and content optimization servers.
- Proven and broad interoperability with all major network equipment vendors.
- Leads in benchmark 3G and 4G performance testing as validated at the Light Reading megatest in 2010.
- Field proven in both 3G and LTE production environments supporting live traffic.
- Proven policy control across all access technologies.
- Integration with 4G intelligent broadband controls portfolio that features Bridgewater® Home Subscriber Server (HSS) and Bridgewater's Subscriber Data Broker™ .

About Bridgewater Systems

Bridgewater Systems, the leader in intelligent broadband controls, provides pre-integrated solutions for mobile and converged operators to transform their networks, optimize mobile data growth, and innovate with new services. The Bridgewater portfolio of carrier-grade products includes Service Controller (AAA), Policy Controller (PCRF) and Home Subscriber Server (HSS), anchored by a common identity and device management system. More than 150 leading service providers worldwide leverage Bridgewater to create and deliver profitable services to consumer, enterprise, cloud and machine markets.
